Advantages of ALKACLEAN

- Cleaning and disinfecting
- Descaling properties

• Equipment cleaning

Alkaclean has detergent, disinfectant, degreasant and oxydant properties. Alkaclean is also descaling to complete the action of Acidclean.

Alkaclean must be used hot preferably in the morning alternating daily with Acidclean.

• Disinfection

Alkaclean is a concentrated product for cleaning and disinfecting the milking equipment.

• Directions for use

- After milking, rinse the equipment with tepid water.
- Circulate a solution of Alkaclean in hot water between 82-77 deg at a concentration of 0.5% and a duration time of 8-10 minutes.
- Rinse with cold water at the end.

• Main components of ALKACLEAN

Substance (s) active (s): Sodium Hypochlorite, expressed as active chlorine 5.62% (expressed as w/w)

Disinfectants are regulatory biocides. They have guarantees of efficiency and protection of human, animals and the environment.
Use biocides safely. Before use read the label and product information.
