- 4 In between/  
Entre/  
Entre

### Advantages of DERMISAN +

- Cloths disinfection
- Soft cleaning of teats

#### • Teat protection

DERMISAN + is suitable for all kinds of herds and all types of farms, especially with rather dirty cows

#### • Teat disinfection

DERMISAN + has a disinfectant that disinfects cloths between milking.

#### • Direction for use

##### Cloth disinfection

- Clean the teats with one cloth by dairy cow.
- Put the used cloth in a second bucket.
- At the end of milking clean cloths to remove as much organic matter.
- Soak cloths between milking in a solution with 0.5% DERMISAN +.

##### Pre-Spraying / Foaming

- Make a stock solution at 7 parts water to 1 part DERMISAN +
- Apply product directly to the teats by spray or foam
- Leave on the teats for 30 seconds
- Wipe the teats with a paper towel or a clean cloth.

#### • Main components of DERMISAN +

Disinfecting agent, thickening agent, non ionic soft surfactants.

Substance(s) active(s) per 100g of product: N-(3-aminopropyl) -N- dodecyl - 1,3-diamine 1.5g

Disinfectants are regulatory biocides. They have guarantees of efficiency and protection of human, animals and the environment.  
Use biocides safely. Before use read the label and product information.
