

Golden Mix

Thick dipping for a maximum disinfection

MILKING

- 1 Before
- 2 During
- 3 After/Après Después
- 4 In between

Advantages of GOLDEN MIX

- Powerful disinfectant: bactericidal, virucidal, yeasticidal
- Cosmetic properties
- Do not drip.

• Teat protection

GOLDEN MIX contains humectant and emollient molecules that allow the skin to retain its natural moisture, and softeners, recognized for reducing the risk of chapped skin.

• Teat disinfection

GOLDEN MIX is a powerful disinfectant effective on 30 seconds over the bacteria responsible for mastitis (Escherichia coli, Streptococcus uberis, Streptococcus agalactiae...)

GOLDEN MIX is also effective on Orthopoxvirus responsible of the vaccinia (EN 14675) and on the yeasts: Candida albicans (EN 1657).

• Direction for use

Golden Mix is produced by mixing on equal parts Golden Mix base and Golden Mix activ'. Shake well the mixture before using to obtain a homogeneous solution (yellow-orange). Applies dipping.

Golden Mix must be prepared for a maximum of 2 milking to ensure its effectiveness.

• Main components of GOLDEN MIX

Chlorine dioxide, lactic acid, moisturizing, surfactant, filming and viscosity-forming agents.

Active(s) substance(s) per 100g of product: Chlorine dioxide 0,035g+Lactic acid L- (+)- 2,663g

Disinfectants are regulatory biocides. They have guarantees of efficiency and protection of human, animals and the environment. Use biocides safely. Before use read the label and product information.
