### Advantages of HYPRACID PLUS

- Removes mineral deposits
- Detergency properties

### • Equipment cleaning

Hypracid Plus is a concentrated product for removing the milkstone and cleaning the milking equipment. Hypracid Plus has a strong cleaning power through the surfactants contained in its formula.

### • Properties

Hypracid Plus has a very high rate of Nitric acid (strengthened with sulfuric acid) which gives the capacity to eliminate the mineral deposit coming from the milk as well as the calcium carbonate film left by the water after the rinsing stage.

### • Direction for use

- After milking, rinse the equipment with tepid water. Circulate a solution of Hypracid Plus at a concentration of 0.5% and a duration time of 8-10 minutes.
- Rinse with cold water.

### • Main components of HYPRACID PLUS

- Nitric acid, Sulfuric acid, antifoaming surfactants...
