

# Liq-io concentrate

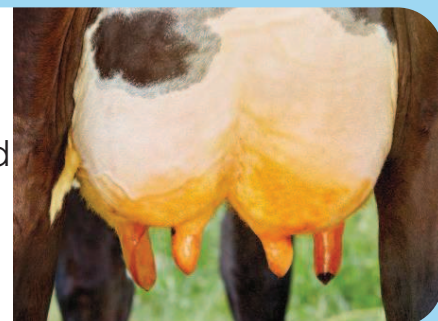

Disinfectant and cosmetic spray for udder hygiene after milking

## MILKING

- 1 Before
- 2 During
- 3 After/Après  
Después
- 4 In between

### Advantages of LIQ-IO CONCENTRATE

- Disinfectant bactericidal, yeasticidal and virucidal
- Cosmetic power

#### • Teat protection

Liq-io concentrate is a concentrated solution to use after dilution.

Liq-io concentrate contains 25000 ppm iodine and is enriched with softening, emollient and moisturizing substances.

#### • Teat disinfection

**Liq-io concentrate**, diluted at **10% v/v and 20% v/v**, is bactericidal in **1 minute**, EN1656 on:

- ✓ Escherichia coli, Staphylococcus aureus, Streptococcus uberis

**Liq-io concentrate**, diluted at **10% v/v and 20% v/v**, is yeasticidal in **1 minute**, EN 1657 on:

- ✓ Candida albicans

**Liq-io concentrate**, diluted at **20% v/v**, is virucidal in **5 minutes**, EN14675 on:

- ✓ ECBO, Orthopoxvirus

#### • Direction for use

Concentrated product to be diluted:

- ✓ At **10% v/v** for **bactericidal** and **yeasticidal** action
- ✓ At **20% v/v** for **bactericidal**, **yeasticidal** and **virucidal** action

Apply the diluted solution by spraying on the full length of the teat and basis of the udder. Possible to apply by dipping.

#### • Main components of LIQ-IO CONCENTRATE

Active substance: 25000 mg/kg iodine in the form of iiodophor

Other components: softening, moisturizing, emollient, surfactants, pH regulating agent, thickening and film-forming agent

Disinfectants are regulatory biocides. They have guarantees of efficiency and protection of human, animals and the environment.

Use biocides safely. Before use read the label and product information.
