

# Virolac gold

Sprayable liquid for teats protection based on LSA

## MILKING

- 1 Before
- 2 During
- 3 After/Après  
Después
- 4 In between

### Advantages of VIROLAC GOLD

- Powerful disinfectant: LSA® (bactericidal, virucidal, yeasticidal)
- Great cosmetic power

#### • Teat protection

Virolac Gold contains cosmetic agents adapted to the most difficult breeding situations.

Virolac Gold contains allantoin known for its healing properties.

#### • Teat disinfection

Virolac Gold contains an active complex and a very powerful disinfectant: LSA®

LSA® is based on a hydroxy acids complex.

The LSA® complex is effective on mastitis causing germs: Streptococcus uberis, Streptococcus agalactiae, Staphylococcus aureus, Escherichia coli (EN1656).

The LSA® complex is also effective on yeasts: Candida albicans (EN 1657), and Ortopoxvirus the responsible of vaccinia (NFT 72-180).

#### • Direction for use

- Ready to use, after milking.
- Manual or automatic spraying
- Recommended for damaged teats.

#### • Main components of VIROLAC GOLD

LSA® (hydroxy acids complex), moisturizers, emollients, healing additive.

Active (s) substance (s) per 100g of product: acid L - (+) - lactic 2g + Salicylic acid 0.099g

Disinfectants are regulatory biocides. They have guarantees of efficiency and protection of human, animals and the environment.  
Use biocides safely. Before use read the label and product information.
